Example of 2-Color Patterns

Closed Average (Home-Market, etc.) The pattern that appears in passing is only flowers. About 5 seconds in an open environment when the closed environment passes the green leaves become invisible. In addition to the patterns that appear in the indoor environment when the outer outlets are average, it becomes visible on the surrounding leaves

All our products are made from 100% special sweat resistant cotton.

This product is different from others, the pattern that appears in the indoor environment such as home, workplace, market, etc. is only the yellow floral designs on the left side. In addition to the appearance of yellow flowers when you go outside, there is the appearance of patterns of red flowers that are not visible inside. Thus, the two motifs combine to create a dazzling and surprising heart pattern. The difference is that the middle motif is visible in the closed environment. When you open your driveway, it becomes visible in the surrounding models.

In our heart pattern, the appearance on the inside appears to the left, and the appearance on the road appears in the right image. When you enter the closed circle, it becomes the first one again.

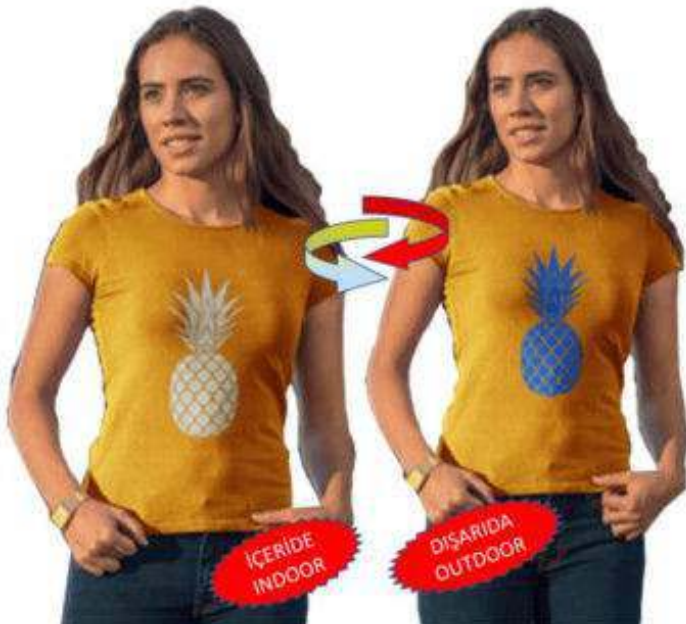

Night shiny black T-shirt template
 Night, black glossy T-shirt template (or another color) applied to it. Outside, the pattern is white. The pattern starts to shine when it's dark..

Technological Nano glowing T-shirt in the dark
 The color of the pattern will be very light in the closed environment, the lights glow when the darkness is past.
 All sizes available for women-men and children (S-M-L-XL-XXL and 4-12 years)

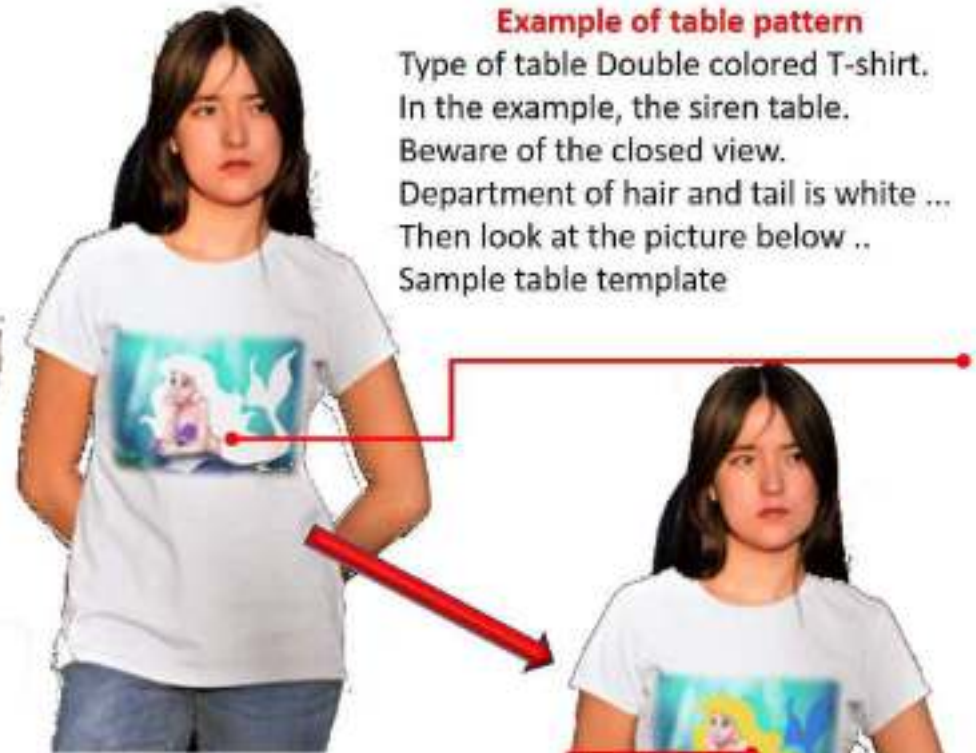

Color T-shirt template

When the media outlets are open, the pre-encoded pattern and the selected color become unique to visible. Color conversions in open and closed midrange ends on average 2 to 5 seconds.

Example of table pattern

Type of table Double colored T-shirt. In the example, the siren table. Beware of the closed view. Department of hair and tail is white ... Then look at the picture below .. Sample table template

When you walk out of the street, only 2 to 5 seconds yellow hair and the tail section of the yellow girl turns Blue Renge. When Closed Media is entered, the first view is switched again.

Example of 2-color patterns

In the example, Lion, the inner main lines appear in black.
After 2 to 5 seconds of the street exit, the previously selected color is transformed.
Then examine the next image.
Different models of display inside and outside

When you go out on the street, the black pattern fills with the color preselected in the colors. When Closed Media is entered, the first view is switched again.

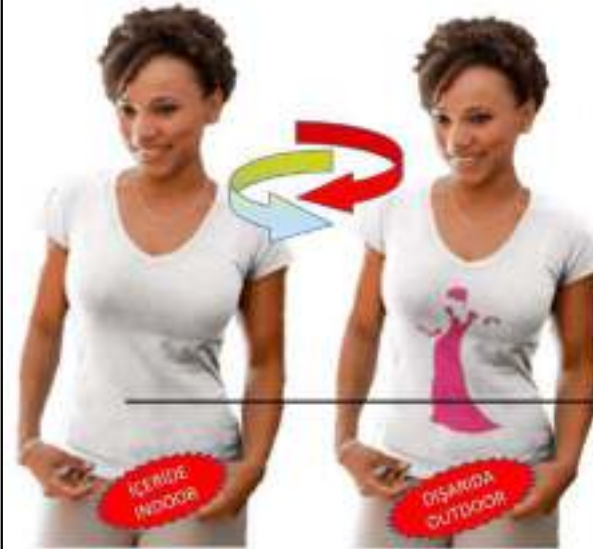

For colors, you can choose yellow, dark pink, red and blue.

If desired, these colors can be chosen instead of the brilliant type at night.

Open hatch model Renge colorless

In our model, Home-Market etc. There is no patterns on the T-shirt in the indoor media.

Special product first quality 100% cotton woven fabric. After use, do not compress

Nanotechnology changing color t-shirt

SWEATSHIRT MODEL

On the left, the black and white lion motif only in a closed environment. Transformation at the exit of the street, the desired Renegade turns.

Shimmery T-shirt in a closed environment

In this model, the pattern that appears outside as in the streets is colorful, light green. The pattern begins to smudge when the intensity is entered. Softness increases proportionally with darkness. It will be beautiful enough to illuminate the periphery of the drawing in the dark. Technology nano glowing t-shirt in the dark.

The color of the pattern will be very light in the closed environment, the lights glow when the darkness is past. All sizes available for women-men and children (S-M-L-XL-XXL and 4-12 years)

When Intensity or Darkness is entered, the pattern as it appears in the right image begins to be colored. When there is nothing to look at as in the darkness of the tar, the motive is beautiful with a green glow. Color conversions in open and closed midrange end on average 2 to 5 seconds. First quality 100% cotton special woven fabric produced Terlemez, after use, does not compress ...

Black t-shirt The Color Of The White Colour Conversions

In this model, the pattern on the black T-shirt is white. Within 2 to 5 seconds, when the output to the outside turns into a pre-coded model as follows,.

In addition to the amazing features of Nano Technological that change color, it's actually like getting 2 products at the price of 1 product in the simplest terms. In addition to the color changes and appearance patterns that appear when the sun is out, it creates a unique appearance in invisible patterns.

This nano-tech t-shirt appears in a white pattern on a black t-shirt in a home, office or indoor environment. When you go out, immediately look at the color. When you go inside, it turns white again.

When the media outlets are open, the pre-encoded pattern and the selected color become unique to visible. The conversion color is dark pink-red. Color conversions in open and closed midrange end on average 2 to 5 seconds.

Example of colorless Renge models

In our model, Home-Market etc. There is no boss on T-shirt in the indoor media. Unlimited designs improve customer quality.

When the media outlets are open, the pre-encoded pattern and the selected color become unique and visible. Color conversions in open and closed midrange occur on average 2 to 5 seconds.

Practical white T-shirt, the pattern is virtually invisible.
